Vol. 282, Nos. 1–4 **November 10, 2003**

Special Issue: Mountain Hydrology and Water Resources

Preface 1

A linear upslope-time-delay model for orographic precipitation
R.B. Smith 2

Floods in mountain areas—an overview based on examples from Switzerland
R. Weingartner, M. Barben and M. Spreafico 10

Management of water resources and low flow estimation for the Himalayan basins of Nepal
S.R. Chalise, S.R. Kansakar, G. Rees, K. Croker and M. Zaidman 25

The hydrological role of snow and glaciers in alpine river basins and their distributed modeling
M. Verbunt, J. Gurtz, K. Jasper, H. Lang, P. Warmerdam and M. Zappa 36

Use of statistically and dynamically downscaled atmospheric model output for hydrologic simulations in three mountainous basins in the western United States
L.E. Hay and M.P. Clark 56

Evaluation of snow-surface energy balance models in alpine terrain
C. Fierz, P. Riber, E.E. Adams, A.R. Curran, P.M.B. Föhn, M. Lehning and C. Plüss 76

Redistribution of snow and glacier mass balance from a hydrometeorological model
M. Kuhn 95

Temperature index melt modelling in mountain areas
R. Hock 104

The concept of glacier storage: a review
P. Jansson, R. Hock and T. Schneider 116

The impact of glaciers on the runoff and the reconstruction of mass balance history from hydrological data in the tropical Cordillera Blanca, Perú
G. Kaser, I. Juen, C. Georges, J. Gómez and W. Tamayo 130

Modelling changes in the mass balance of glaciers of the northern hemisphere for a transient $2 \times CO_2$ scenario
C. Schneeberger, H. Blatter, A. Abe-Ouchi and M. Wild 145

Mountain and subpolar glaciers show an increase in sensitivity to climate warming and intensification of the water cycle
M. Dyurgerov 164

Mountain cryospheric studies and the WCRP climate and cryosphere (CliC) project
R.G. Barry 177

PII: S0022-1694(03)00372-X
